

uWS::Group< CLIENT
>::close

uWS::WebSocket::handleFragment

uWS::WebSocket::close

```
graph LR; A[uWS::Group< CLIENT >::close] --> C[uWS::WebSocket::close]; B[uWS::WebSocket::handleFragment] --> C;
```

The diagram illustrates a call flow where two functions, `uWS::Group< CLIENT >::close` and `uWS::WebSocket::handleFragment`, both call the `uWS::WebSocket::close` function. The target function is highlighted in gray.
